

## **EXCEPTIONS REPORT**

**Date:** Wednesday, June 21<sup>st</sup>, 2023.

**Inspector:** Yeshua Chilibingua – Jsons.

**Team Inspected:** Code Warriors

### **In the section of entering products:**

- In the id allows negative numbers.
- In quantity allows negative numbers.
- In price it allows negative numbers and strings and it crashes.

### **In the supplier contacts section:**

- When the respective menu is displayed, if we enter a float and a string, the program closes.

### **In the supplier contacts section in the sub-option to change order:**

- It asks us for a product to change, and allows all kinds of data.
- Later asks about which item you want to change, and likewise, allows you to enter all kinds of data.

### **In the section to enter distributor:**

- When entering the contact number of the distributor, it allows all types of data.

### **It was necessary to validate 3 options:**

- When entering them they did nothing, only a 'working' message came out.
